

*A huge thank you to every person who cared for our mother in the last stage of her life. You were always so kind and gentle in your care of her and so accommodating to her wants and needs- even learning how to make poached eggs for her! But your care went beyond just for our mother. Every time you came in to her room, you never left before asking if you could do or get anything for her family member(s) there. In my eyes every one of you is an angel of God.
